<b>CO</b>	Confidential, only for members of the consortium (including the Commission Services)	

# 1. EESI Public Web site: from EESI 1 to EESI 2

---

Link EESI Website: <http://www.eesi-project.eu>

Three main objectives were targeted for the project web:

- To ensure continuity with the EESI1 web site look and content.
- To get a public available web site quickly within the first three months of the project.
- To improve it to have a powerful web site using up to date internet capabilities.

To reach these objectives a step by step approach has been implemented:

- To choose a subcontractor capable to manage and develop a powerful web site. The society E-Wellcom who developed EESI1 web site has been chosen.
- To take control of EESI1 web site and ensure its maintenance and effectiveness on a dedicated server as standard EESI web site. This was done in November 2013 as required.
- To modify slightly the EESI web site to update and improve dynamically its content and open a private collaborative web site for the consortium accessible from the public web site.
- To finally develop in parallel a new up to date EESI web site which should replace the former when finalized. The new web site should ensure continuity with the previous web site, accessibility to all and be a responsive web site. The web site will be conceived in order to be adaptable to different screens (laptops, smartphones etc.).
